

LEYA BREANNA BALTAXE-ADMONY

Data Scientist - Musician - Human Centered Design Researcher

@ bbaltaxe@ucsc.edu ☎ +1 818-571-7237 in www.linkedin.com/in/baltaxe

Objective:

I am a hard-working researcher who has demonstrated a diverse body of knowledge in both academia and industry. I hope to complete an industry-focused PhD. I am currently searching for industry collaborators to begin dissertation research with.

EDUCATION

🎓 Ph.D in Computational Media, Human Computer Interaction
University of California Santa Cruz

📅 Fall 2018 – Present

🎓 B.S. in Computer Engineering, Robotics and Control
University of California Santa Cruz

📅 Fall 2014 – Spring 2018

RESEARCH

Noteworthy Projects:

SpokeIt: Developing algorithms for speech error recognition

📅 Ongoing

SpokeIt is a speech therapy game which caters to children with cleft palate. I am currently working to develop machine learning algorithms to identify hyper-nasality and high-pressure errors in children's voice interactions. Model development is done using audio files from real therapy sessions provided by our collaboration with SmileTrain.

Study Girl: Collecting data on an emerging workstyle

📅 Ongoing

This project explores the space of livestream music/study channels.

Data is collected from multiple sources, including the streams chat data, users in person, and conducting experimental user studies. To scrape chat data, I developed cloud infrastructure to collect and store large volumes of data using various Google Cloud APIs and Amazon Web Services infrastructure. With a team of two other researchers, I designed and conducted an experimental study and semi-structure interview protocol.

Crux: creating a soft exosuit for musculoskeletal rehabilitation

📅 2016-2017

Crux is a lightweight, cable-driven, robotic exosuit for upper-extremity rehabilitation. My role in this project encompassed mechatronic design and user evaluation of various prototypes once they were built. The suit was designed and tested alongside practitioners and individuals from the Cabrillo Stroke Center and Hope Services, Santa Cruz.

WORK EXPERIENCE

Graduate Student Researcher

Assistive Sociotechnical Solutions for Individuals with Special needs using Technology Lab (ASSIST)

Participatory design of audio systems to help individuals interface with the world and technologies around them.

📅 Fall 2018 - Present

📍 Santa Cruz, CA

Computational Media Graduate Community Manager

Baskin School of Engineering, University of California Santa Cruz

Organizing graduate community events, department programs, and workshops to strengthen and educate a community of engineers, artists, social scientists and more.

📅 Fall 2018-Present

📍 Santa Cruz, CA

Voice Assistant Software Engineering Intern

Plantronics

Design and implementation of voice user interfaces for consumer and enterprise applications using Google Cloud Platform and Amazon Web Services.

📅 Summer 2018

📍 Santa Cruz, CA

Undergraduate Researcher

Mircea Teodorescu Lab & ASSIST Lab

Bio-inspired soft robotics design geared towards musculoskeletal rehabilitation. Including hardware design, mechanical design, and user studies.

📅 Spring 2015 - Spring 2018

📍 Santa Cruz, CA

Visiting Technologist

National Institute of Advanced Industrial Science & Tokyo Institute of Technology

Embedded System Design for Individuals with Special Needs

📅 Summer 2017

📍 Tokyo, Japan

Test Engineer Intern

NASA Ames Research Center

Tested new mechanical structures. This involved rapid prototyping, and automating existing mechanical testing.

📅 Summer 2016

📍 Mountain View, CA

Engineering Intern

Bearaxe Engineering

Preliminary design and prototype of an electric motorcycle. I was required to source parts and design from scratch both mechanical parts and electrical systems. This position also required me to revamp existing motorcycle's electrical systems.

📅 Summer 2015

📍 Los Angeles, CA

TEACHING EXPERIENCE

Research Mentor

Science Internship Program

Closely collaborated with two high school interns on software development for various research projects. This included teaching basic human research practices, machine learning and web development.

📅 Summer 2019

Teaching Assistant

Algorithmic Music for Games

Led instruction of 70+ students in 1/3 of class discussion. Graded and assisted students in programmatically synthesizing various audio, and incorporating it into existing game frameworks.

📅 Spring 2019

Engineering Laboratory Instructor

Baskin School of Engineering

Courses:

★ Assembly and Systems

★ Discrete Mathematics

★ Data Structures and Algorithms

📅 Spring 2015 - Winter 2018

Girls Coding Instructor

Plantronics

Teaching middle school girls in Santa Cruz County to code using Scratch. This was an event hosted by Plantronics which I helped to organize and facilitate.

📅 Summer 2018

HONORS & COMMENDATIONS

★ UCSC Mechatronics Competition Winner

★ Grace Hopper Celebration 2018 Scholar

★ Women in Engineering, International Leadership Conference Scholarship

★ Merit Scholarship for Academic Excellence

★ Future Generation of Jazz Scholarship

★ UCSC Honor Program

★ Certificate of Recognition for Achievement in Undergraduate Research

★ UCSC IEEE Branch President

★ Dean's List

SKILLS

As a whole, my work centers around various human centered design practices. My recent work involves data science and machine learning. I also have a strong historical background in mechatronic systems design.

Design: Rapid Prototyping User Testing 3D Modeling Data Analysis Qualitative Methods
Participatory Design Voice User Interface Design Systems Design

Programming: Python C/C++ JavaScript Keras / Tensorflow Matlab Unix

HOBBIES

Trombone Climbing Surfing Backpacking Mountain Biking Cooking Board Games
